

Escape-Mattress® SOLO / FOLD / COMPACT

Evacuation ... in a lying position

What`s an Escape-Mattress®?

Escape-Mattress® models are designed for people who find it difficult to comfortably get into an evacuation chair, or where evacuation chairs may struggle (for example when evacuating down a spiral staircase). Evacuation mattresses are ideal for Medical Centre's and Hospitals, as they cater for complex healthcare needs. E.g. bed-bound and unconscious patients. The Escape-Mattress® models are designed for different situations to meet the needs of certain environments.

How does an Escape-Mattress® work?

Escape-Mattress® models can be used to move evacuees along the floor (min. 2 persons) and have handles strategically placed on the side to allow easy maneuverability.

Advantages Escape-Mattress®:

- Made of high quality materials (fire resistance classification M2).
- Extra-long towing straps to help operators with improved handling practices.
- Handgrips to assist with sideways manoeuvrability.
- Carrying people is no longer necessary.
- Ready for use within seconds.
- Safe evacuation down the stairs.
- Speed of descent is determined by the user.
- Easily maneuvering into the evacuation flow.
- Fits into your emergency evacuation plan.
- TÜV & CE certified.

Our advice:

Make sure you have an Escape-Mattress® available in your Organization, so you can help people who rely on you to be rescued safely. Even when you need to tackle spiral staircases.
