

Escape-Mattress® Junior

Evacuation ... of a daycare center

What`s an Escape-Mattress®?

The Escape-Mattress® Junior is designed for Evacuating 2 toddlers (up to 3 years) at the same time in lying position. The Escape-Mattress® Junior can be used by a single operator only. Also suitable for spiral staircases.

How does an Escape-Mattress® work?

The Escape-Mattress® Junior can be used to move evacuees along the floor (by only 1 operator). This means that the toddlers do not have to be carried down the stairs in the event of an emergency evacuation.

Advantages Escape-Mattress®:

- Made of high quality materials (fire resistance classification M2).
- Extra-long towing straps to help operators with improved handling practices.
- Carrying toddlers is no longer necessary.
- Ready for use within seconds.
- Safe evacuation down the stairs.
- Easily maneuvering into the evacuation flow.
- Speed of descent is determined by the user.
- Fits into your emergency evacuation plan.
- CE & TÜV certified.

Our advice:

Make sure you have an Escape-Mattress® Junior available, so you can help toddlers who rely on you to be rescued safely. Even when you need to tackle spiral staircases.
